

About Optum

The people of Optum are creating a higher-performing, value-oriented and more connected health system to help every person in every community. Bringing together clinical expertise, technology and data to make care simpler, more effective and more affordable, we are advancing whole-person health, creating a seamless consumer experience and supporting clinicians with insights to deliver personalized, evidence-based care – where, when and how people want it.

Our businesses

Optum Health

Optum Health is accelerating a patient-centered, value-based care model to achieve quality outcomes and improved experiences for patients, while lowering the total cost of care. Serving nearly 103 million individuals, we proactively engage people in managing their health and well-being in-person, in-home and virtually, and we empower care teams with the latest information and insights to help them efficiently coordinate patient care.

Optum Insight

Optum Insight is creating stronger connections across payers, providers and consumers through software-enabled services and analytics to make clinical, administrative and financial processes simpler and more efficient. We apply advanced data, technology and clinical expertise within the decision-making flow to improve the entire health care experience.

Optum Rx

Optum Rx is integrating pharmacy, medical and behavioral care through its full spectrum of pharmacy services and benefits to give more than 62 million consumers affordable access to prescription medications and therapies, comprehensively manage their complex care needs and provide a better, more transparent digital pharmacy experience.
